## VISION

In present scenario there is a great challenge for the teaching and learning process in the science and technology. I envisage the GTU becoming the centre of excellence in technical education and establishing research nationally and globally via student centered teaching and learning processes, research activities and community services.

GTU must serve as a medium to nurture students highly qualified in the various specializations like technological, pharmaceutical, management and computer applications to sustain a competent teaching force meritorious in the professionalism and conscious of its role in the pursuit of the national prosperity and global acceptability.

I imagine GTU to produce degree holders that are first-rate in soft skill such as in communication, teamwork, creative & positive thinking, business management and entrepreneur skills.

The university shall serve as a catalyst for innovations and discoveries in technical and pharmaceutical sciences for the promotion of quality of life, sustainable economic growth and environment protection. These innovations in the basic research must be protected by patent for the glory of nation.

GTU must promote cultivation of culturally competent, intellectually inquisitive, self-directed technocrats, caring pharmacists and administrators who are critical thinkers, problem solvers and life-long learners in a changing global environment.

GTU has established credit as paperless and innovative university trying to fulfill the concept of 'Digital India' and earned number of awards; it needs to continue in the days to come.

I believe that partnering with industry is the best way to give practical shape to the cherished ideas of university students to reduce large gap between industry's needs and the academic community's aspirations leading to better placement of quality students.

Development of sound professional expertise in an atmosphere of academic freedom for preservation, enrichment and propagation of Indian cultural heritage rooted upon a sense of history and tradition for the protection and advancement of human dignity.
